

Shoulder Ultrasound Workshops

This is a one day course designed to introduce and advance delegates skills of shoulder ultrasound scanning.

This course is aimed at rheumatologists, orthopaedic surgeons, sports medicine clinicians, therapists and other clinicians with an interest or experience of shoulder ultrasound scanning.

The invited faculty includes experts from the fields of orthopaedic surgery, physiotherapy, sports medicine and radiology. All are experienced level 3 practitioners in shoulder ultrasound.

The course comprises of short lectures, group discussions, case presentations, demonstrations and lots of hands-on skills sessions. Emphasis is normal on pathology recognition, diagnostic accuracy, office ultrasound in practice and ultrasound guided injections.

There is a high ratio of faculty to participants, ensuring maximum hands-on experience and allowing plenty of opportunity for participation and discussion.

Real patients will be utilised, with a range of pathologies. Each delegate will scan every patient under supervision, with one-on-one feedback.

Early application is recommended in order to avoid disappointment, as places are limited.

Participants: Max 20 participants.

Educational Objectives of the Course:

1. To understand the normal ultrasound anatomy of the shoulder and recognise pathology.
2. To identify the indications for shoulder ultrasound.
3. To understand the place of shoulder ultrasound in clinical practice.
4. To appreciate the ultrasonography features of pathological disorders.
5. To understand the limitations of shoulder ultrasound.
6. To further appreciate the role and technique of ultrasound guided injections.
7. To improve confidence in the technique of shoulder ultrasound scanning.
